INGENIERÍA CONSULTORÍA E.P.M. S.L.

RESOURCES

The E.P.M.'s team is composed by high cualification specialists which covers all necessary fields for executing most diversas disciplines (industrial engineer specialized in: electricity, climatization, security, data and voice networks, structural calculations, environment, alternative energies, etc; measuring and budgets technical, planning and other).

The coordination of each order is estrusted to a Project Director who is choosen according with his knowledge, management experience and depending on the projects size.

E.P.M. has modern and powerful working tools like the calculating, drawing and computer-aided management. The programs used have been periodically tested and improved, reaching a high security in economic management, planning and monitering the works.

The constant presence of our managers and technical specialists in the Works, ensure the control of the expected results until settlement and implementation of the project.

TYPES OF SERVICE:

E.P.M. can assume complete missions from investment planning to the implementation of Works and installations. Also we can take part in one or several stages included in a total realization.

The main stages of a complete engineering mission are:

BASIC PROJECTS

- Study of alternatives
- Optimization solutions
- Preliminary design
- Economic assessments
- Obtaining of official permits

TECHNICAL DIRECTION OF THE WORKS

- Planning
- Quantitative control
- Quality control
- Security Plan

ECONOMIC LEADER SHIP OF THE WORKS

- Measurements
- Certifications
- Budgetary control
- Guarantees management

DETAIL PROJECT

- Calculation
- Memories
- Detail plots
- Construction schedule
- Technical Specifications
- Measurements and estimates

PRE-FEASIBILITY STUDIES

- Planning and feasibility of new investments
- Cost estimate
- Study sites and urban conditions

PROCUREMENT MANAGEMENT

- Request for suppliers
- Evaluation and comparison of budgets
- Preparation of contracts

LAUNCH

- Receiving protocols
- “as built” plots
- Operation and maintenance programs

ACTIVITY SECTOR

EDIFICATION:

E.P.M. is specialized in singular building projects with a high requirement in architectural design and sophisticated facilities.

INSTALLATIONS:

E.P.M. designs installations of energy, comfort, security and voice and data networks. Different departments work on their own projects and on other architects projects.

INFRAESTRUCTURES:

E.P.M. has developed important projects for both the public and private sectors such as transport, energy supply networks and water, drainage, purification, etc.

NATURAL

ENVIRONMENT:

E.P.M. always incorporates the latest technical and legislative innovations to its designs and it's ready to provide expert services in diverse environmental and industrial safety areas.

TELECOMUNICATIONS:

E.P.M. has developed important works in telecommunication field, such as building design for audifovisual production and communication networks.

MONITORING AND CONTROL OF THE WORKS:

E.P.M. handles the control of the works proposed by other professionals and engineers, providing management services for the clients.

In this case, E.P.M. monitors the works made by others, helping the client to buy in best conditions. E.P.M. is responsible for the economic control, runtime planning, and monitors the works quality. E.P.M. acts as an arm of the client putting their experience to control the investment.

EDIFICATION

-

ENVIRONMENT & SECURITY

- Environment Audit.
- Environment Impact Studies.
- Contaminated soil survey.
- Analisis and evaluation of industrial risks.
- Study of risk in transportation.
- Emergency Planning.
- Waste Treatment.

TELECOMUNICATION

- TV Centers.
- Audiovisual Production Studios.
- Telecommunication Towers.
- Transmission y Distribution Network.
- Audio & video projector for professional.
- Cable TV Networks.
- Fixed & Mobile Telephony.

CONTROL & MONITORING OF THE WORKS

- Design review & measurements.
- Providing recruitment management.
- Permits, licenses & legalization.
- Economic control, certifications & warranties.
- Planning & monitoring the progress of the works.
- Quality Control.
- Reception & implementation.
